Further restriction and/or election of species will be required if this group is selected.

The inventions of groups I, II, and IV differ from each other because each group is drawn to a ring system that is distinct and patentable over each other. Essentially, these are three independent inventions as compounds of one group can be utilized alone, and not in combination of those in other groups. Note, with a variable core as such, the common property is not enough to keep three groups in the same Markush claim. Furthermore, a prior art that renders obvious

one invention would not do so to the other. Thus, restriction for examination purpose as indicated is proper. However, should applicant traverse on the ground that the three groups are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the three groups to be obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the invention unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other inventions.

Inventions Groups (I, II, and IV) and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case another compound can improve the excretory potency of an urinary bladder as well.

2. A telephone call was made to Mr. Warren Cheek on 4-4-03 to request an oral election to the above restriction requirement, but a written restriction is preferred.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
